
CONTENTS OF CHEMICAL AND PROCESS ENGINEERING VOL. 40, 2019

ISSUE 1

| | |
|---|-----|
| Robert Grzywacz, Models of airlift bioreactors for double-substrate kinetics. The analysis of sufficient oxygenation conditions with a view of mathematical model choice | 3 |
| Urszula Olsińska, Numerical modelling of ozonation process with respect to bromate formation. Part I – Model development | 21 |
| Urszula Olsińska, Numerical modelling of ozonation process with respect to bromate formation. Part II – Model validation | 39 |
| Björn Lewandowski, Micha Fertig, Georg Krekel, Mathias Ulbricht, Analysis of wake structures in bubbly flows using Particle Image Velocimetry (PIV) | 49 |
| Stanislav V. Battalov, Maxim M. Trubyanov, Egor S. Puzanov, Tatyana S. Sazanova, Pavel N. Drozdov, Ilya V. Vorotyntsev, Membrane gas separation module with pulsed retentate for low-permeable component recovery | 57 |
| Magdalena Lech, Anna Trusek, Selection of batch process conditions for microbiological production of lactic acid using waste whey | 67 |
| Szymon Skoneczny, Bolesław Tabiś, Steady state characteristics of a three-phase fluidized bed bioreactor with partial biomass recirculation | 77 |
| Halina Murasiewicz, Barbara Zakrzewska, Large Eddy Simulation of turbulent flow and heat transfer in a Kenics static mixer | 87 |
| Krzysztof Kowalski, Dorota Downarowicz, Heat transfer in helical coil heat exchanger: An experimental parametric study | 101 |
| Katarzyna Sawicka, Katarzyna Kosowska, Marek Henczka, Application of porogenes in production of porous polymers by supercritical foaming | 115 |
| Barbara Larwa, Krzysztof Kupiec, Study of temperature distribution in the ground | 123 |

ISSUE 2

| | |
|---|-----|
| Editor's notes. In Memoriam of Professor Krzysztof Warmuziński | 143 |
| Szymon Skoneczny, Cellular-automata based modeling of heterogeneous biofilm growth for microbiological processes following various kinetic models | 145 |

| | |
|---|-----|
| Grzegorz Bińczak, Ryszard Pohorecki, Władysław Moniuk, Cezary Możejński, Amine activators of CO ₂ absorption in industrial conditions | 157 |
| Kamil Wierzychowski, Iwona Grabowska, Maciej Pilarek, Propagation of non-adherent HL-60 cells in batch cultures maintained in static and wave-type agitated systems | 167 |
| Kinga Rajewska, Anna Smoczkiwicz-Wojciechowska, Jerzy Majka, Intensification of beech wood drying process using microwaves | 179 |
| Arkadiusz Szydełko, Dorota Nowak-Woźny, Bartosz Urbanek, Laura González Valdés, Wiesław Rybak, Sequential leaching analysis to investigate the sintering process of coal, cereal pellets and wood pellets ash | 189 |
| Tomasz Kiljański, A correction method of the wall-slip effect in a cone-plate rheometer | 201 |
| Anna Rył, Piotr Owczarz, Influence of shear direction on gelation ability of colloidal chitosan solutions | 207 |
| Filip Mikołajczyk, Kamil Kamiński, A study of ruthenium-based catalysts used in homogeneous transfer hydrogenation of acetophenone | 213 |
| Witold Suchecki, Investigation of the sedimentation process using flow visualization methods | 223 |
| Andrzej G. Chmielewski, Agata Urbaniak, Jacek Palige, Otton Roubinek, Katarzyna Wawryniuk, Andrzej Dobrowolski, Membrane installation for biogas enrichment – Field tests and system simulation | 235 |

ISSUE 3

| | |
|---|-----|
| Marek Berezowski, A method of suppressing chaos in a chemical reactor and the use of chaos for identifying the reactor model | 265 |
| Anna Konopacka, Maciej Konopacki, Marian Kordas, Rafał Rakoczy, Mathematical modeling of ethanol production by <i>Saccharomyces cerevisiae</i> in batch culture with non-structured model | 281 |
| Maciej Konopacki, Marian Kordas, Rafał Rakoczy, Intensification of free-convection heat transfer in magnetically assisted bioreactor | 293 |
| Katarzyna Samborska, Alicja Barańska, Daria Bodel, Aleksandra Jedlińska, Investigation on the possibility to enhancing honey spray drying process and powders properties by ultrafiltration pre-treatment | 305 |
| Arkadiusz Białek, Katarzyna Skrzypczyńska, Krzysztof Kuśmierk, Andrzej Świątkowski, Sensitivity change of the modified carbon paste electrodes for detection of chlorinated phenoxy-acetic acids | 315 |
| Nesa Dibagar, Stefan J. Kowalski, Reza Amiri Chayjan, Water absorption of black chickpea using a finite difference method | 327 |

ISSUE 4

| | |
|---|-----|
| Editor's notes. In memoriam of Professor Jerzy Bałdyga | 347 |
| Editor's notes. In memoriam of Professor Wioletta Podgórska | 349 |

| | |
|---|-----|
| Krzysztof Neupauer, Maciej Kabziński, Impact of carrageenan addition on rheological characterisation of some hydrocolloid aqueous solutions during long-lasting agitating with rotational speed changes | 351 |
| Zuzanna Bojarska, Marta Mazurkiewicz-Pawlicka, Łukasz Makowski, Graphene oxide-based nanomaterials as catalysts for oxygen reduction reaction | 361 |
| Łukasz Żywczyk, Arkadiusz Moskal, RafałPrzekop, Numerical simulation of deformation and fragmentation of fractal-like nanoaggregates | 377 |
| Anna Zalewska, Ireneusz Grubecki, Joanna Kowalik, Application of turbiscan lab to study the effect of emulsifier content on the stability of plant origin dispersion | 399 |
| Monika Budnicka, Agnieszka Gadomska-Gajadhur, Paweł Ruśkowski, Manufacturing of substitutes for spongy bone with increased absorbability | 411 |
| Acknowledgments to Reviewers 2019 | 425 |
| Contents of Chemical and Process Engineering, Vol. 40, 2019 | 427 |
| Author index. Chemical and Process Engineering, Vol. 40, 2019 | 431 |
